FOREWORD

THIS edition of THE WORLD OF LEARNING contains the latest available information on cultural, scientific and higher educational institutes throughout the world.

It is interesting to record that since we published the ninth edition of THE WORLD OF LEARNING in 1958, twenty-one newly independent African countries have found their way into our pages, as well as twelve new universities and sixteen new university colleges in the African continent. It will also be found that five new universities have been listed under Great Britain this year for the first time, so it quickly becomes apparent that rapid development is taking place not only in the newly emerging countries, but also in the older-established ones.

Once again we should like to thank our many thousands of contributors, without whose help the present edition could not have been produced. May we hope that this volume will help them and many others to find their way about the complexities of "the world of learning" with much greater assurance than would otherwise have been possible.

December 1963.

UNESCO

UNITED NATIONS EDUCATIONAL, SCIENTIFIC AND CULTURAL ORGANISATION

AIMS AND FUNCTIONS

(*Article 1 of Unesco Constitution*)

The purpose of the Organisation is to contribute to peace and security by promoting collaboration among the nations through education, science, and culture in order to further universal respect for justice, for the rule of law, and for the human rights and fundamental freedoms which are affirmed for the peoples of the world, without distinction of race, sex, language, or religion, by the Charter of the United Nations.

To achieve Unesco's purpose, the General Conference adopts at its biennial sessions a basic programme which stresses the main ideas underlying the aims of the Organisation and gives coherence to the detailed work plans. While the latter naturally vary from year to year, the basic programme covers the policies and main lines of work, with little change except of emphasis on this or that sector.

The chief tasks of Unesco, as defined in its basic programme, are as follows:

1. To eliminate illiteracy and encourage universal free and compulsory education;

2. to obtain for each person an education conforming to his aptitudes and to the needs of society, including technological training and higher education;

3. to promote, through education, respect for Human Rights throughout all nations;

4. to overcome the obstacles to the free flow of persons, ideas, and knowledge between the countries of the world;

5. to promote the progress and utilisation of science for the benefit of all mankind;

6. to focus the social sciences on the study of particular social questions for the benefit both of the general public and of governments;

7. to assure the preservation of the world's inheritance of books, works of art and monuments of history and science, to make this cultural heritage known and available to all, and to promote mutual appreciation of differing cultural values;

8. to advance through the press, radio, and motion pictures the cause of truth, freedom, and peace;

9. to bring about better understanding among the peoples of the world and to convince them of the necessity of co-operating loyally with one another in the framework of the United Nations;

10. to provide clearing-house and exchange service in all its fields of action, together with technical aid to nations and peoples in emergencies.

REGULAR PROGRAMME

1. DEVELOPMENT OF INTERNATIONAL CO-OPERATION

Unesco aims to maintain, increase and diffuse knowledge and to encourage co-operation among the nations in all branches of intellectual activity. The League of Nations set up its International Committee on Intellectual Co-operation for the same purpose, and Unesco took over this heritage in an attempt to restore contacts broken by the Second World War. It was realised that an effective and economical method would be, first, to support existing specialist organisations, and second to encourage individual scientists, scholars, writers and artists.

The natural sciences was the first sphere in which Unesco was able to co-operate with an already firmly established body of scientific associations. Unesco's success in this field prompted action where contacts at international level were less advanced. To achieve this a number of institutions were created: the International Council for Philosophy and Humanistic Studies, the International Theatre Institute, the International Music Council, the International Association of Plastic Arts. Unesco also decided to support the work of the International PEN and the International Union of Architects. The International Council of Archives was founded on the initiative of Unesco. Financial aid is given to the International Council of Museums, the International Federation of Library Associations and the International Federation of Documentation.

In the field of social sciences, Unesco promoted establishments in such major disciplines as sociology, political science, legal science and economics. Subventions have been granted to a few carefully-selected associations, including the International Union of Scientific Psychology, the International Statistical Institute, the International Union for the Scientific Study of Population. The International Social Science Council and the International Committee for Social Sciences Documentation were also helped.

In the field of education, financial assistance has been given to the World Confederation of Organisations of the Teaching Profession, the International Association for Teachers' Federation, the International Association for Vocational Guidance, the World Organisation for Early Childhood Education, the New Education Fellowship, etc. A major step was the creation in 1950, with UNESCO's help, of the International Association of Universities. Subventions have also been granted to the International Bureau of Education for its documentation services.

In the field of mass communication, Unesco has found that associations have more varied activities and less well defined programmes. It has founded the International Centre of Films for Children, the International Association for Mass Communication Research, the International Film and Television Council.

Unesco also organises seminars, international discussions and conferences, for example the International Conference of Artists held in 1952, the Conference on Radio-isotopes in Scientific Research held in 1957, the International Conference on Information Processing in June 1959, and the Intergovernmental Conference on Oceanographic Research in July, 1960.

2. IMPROVING DOCUMENTATION

These activities include the collection, analysis and diffusion of information and statistics, and the encouraging of other organisations to do similar work. Since 1948 this has been increasingly achieved through the Education Clearing House.

CC-0. Agamnigam Digital Presevation Foundation, Chandigarh

Unesco has also built up a documentation and information service on opportunities and facilities for study abroad. The annual publications *Study Abroad* and *Vacations Abroad* bring such facts to a wide public.

The Clearing House in Mass Communications collects information on mass media techniques and the technical needs of mass media institutions.

In the field of culture Unesco has produced the *Index Translationum* and archives of colour reproductions of paintings. In the Social Sciences bibliographies have been produced in four major fields, sociology, political science, economics and social and cultural anthropology. Multilingual dictionaries and biographies are being prepared and attempts have been made to standardise techniques and terminologies. A study has also been made of scientific and technical dictionaries and a bibliography of monolingual glossaries has been produced.

Unesco also promotes the creation of scientific and technical documentation centres in order to meet the essential need of scientists and technicians for information on the work of their colleagues elsewhere.

Altogether, 36 national centres for the international exchange of publications are linked with Unesco. One of the chief aims of the International Centre for the study of the Preservation and Restoration of Cultural Property, newly set up in Rome, is to collect, analyse and distribute information concerning scientific and technical problems arising in the fields of preservation and restoration. Similarly the Documentation and Study Centre for the History of Art and Civilisation in Ancient Egypt is now in full operation.

3. SCHOOL EDUCATION

The Unesco programme for school education may be divided into five main parts, Free and Compulsory Education; the School Curriculum and Improvement of Education; Education for International Understanding and Co-operation; Vocational and Technical Education; and Higher Education.

Forty-five per cent of the world's population of fifteen years old and over cannot read or write; forty-five per cent of the world's children of school age do not attend school. Of those who do attend school, many are poorly educated because of inadequate facilities, undertrained teachers and an outmoded curriculum. It is, in addition, realised that the need for humanistic studies and for education for international understanding has never been so great. Recent developments in science and industry have also created new problems in higher education or have accentuated old ones.

Free and Compulsory Education. During the last ten years Unesco has conducted a campaign to extend free and compulsory education to all children of primary school age. A series of international and regional conferences was organised; direct assistance was offered to Member States in the form of experts and of fellowships for national educators; a pilot project was established at Ubol in co-operation with the Government of Thailand. In 1958, the Australian Government, held a regional training course on multiple-class teaching for a group of educators from South-East Asia. The first major effort for training teachers was launched in 1957 as Unesco's Major Project for the Extension of Primary Education in Latin America. The Project concentrates upon teacher training and educational planning, and is now in full operation.

Three major enquiries into the educational needs of tropical Africa, the Arab-speaking States, and South and South-East Asia, were completed, as a result of which the General Conference, in December, 1962, re-adopted programmes for the development of education in these areas, totalling $8.8 million for 1963-64, in addition to a $4 million emergency programme for Africa financed out of voluntary contributions, and to Special Fund activities (*see* below).

The School Curriculum and the Improvement of Education. In 1954 a programme for the Improvement of the School Curriculum was initiated by the creation of an international advisory committee, by the holding of regional seminars, by providing the services of experts, by disseminating information on mechanisms of curriculum revision, curriculum research, etc., by initiating an inquiry into the adaption of the school curriculum to the age and development levels of children. In 1960 Unesco completed an inquiry into the role and place of the humanities in school education. Two outside bodies are closely associated with UNESCO in this field: the International Bureau of Education at Geneva, and the Institute of Education at Hamburg.

Education for International Understanding and Co-operation. Unesco seeks to stimulate interest in educational activities by facilitating international exchanges of ideas among educational leaders and teachers, in aiding in the development of better methods and materials and in encouraging action within schools on many aspects of education for international understanding.

Vocational and Technical Education. Activity in this field has led mainly to the provision of services of experts, fellowships and equipment. Regional conferences and training courses on Vocational and Technical Education have recently been organised.

By an agreement reached in 1960 between UNESCO and the International Labour Office, two new international instruments have been completed, the UNESCO one dealing with technical education in school and the ILO one with vocational training after or out of school.

Higher Education. Work in this sphere is carried out mainly through the International Association of Universities, created in 1950. A scheme of collaboration on a large scale started in 1960 with some of the American Foundations on the subject of access to universities.

4. EDUCATION OUTSIDE SCHOOL

The work in this group of activities is divided into three sections: fundamental education, education of adults, and the development of youth activities.

Fundamental Education (Community Development). The main effort is directed towards those people who have not had the opportunity to go to school. Fundamental education aims at imparting the minimum knowledge and skills that people need to help themselves to improve their standard of living and to take a productive part in the social and economic life of their community. The basic need is to combat ignorance, which extends over half the world's population and is instrumental in breeding disease, poverty and lethargy.

Two regional fundamental education centres have been set up: one for Latin American States at Patzcuaro, Mexico, established in 1951, the other for Arab States at Sirs-el-Layyan, Egypt, established in 1955. Unesco has helped in setting up National Centres, such as at Ubol, Thailand and Minneriya, Ceylon. Expert training centres like the one at Yelwal, in Mysore, have also been set up. Unesco also co-operates in fundamental and adult education projects undertaken by Member States.

Adult Education. The aim is to foster education, not only at school but throughout life. Unesco assists Member States and appropriate international organisations in the development of adult education activities by: co-operating to set up national and regional seminars; sending field

CC-0. Agamnigam Digital Presevation Foundation, Chandigarh

missions to make surveys and advise on projects; publishing reports on projects and activities. In 1960 there took place at Montreal, Canada, the Second World Conference on Adult Education, which stressed the vital importance of all forms of out-of-school education in a rapidly changing world.

Youth Work. The work is concentrated on assisting Member States and appropriate international organisations and institutions in the development of youth education for social responsibility and international understanding and co-operation. The Section supplies information and brings groups interested in the same problems into contact with each other. It also sponsors international voluntary work camps and an annual conference of work camp organisers. Another important interest is the Unesco Youth Institute at Gauting, Germany. The Institute is an international meeting place where conferences are organised to study youth activities.

5. AID TO SCIENTIFIC RESEARCH IN THE NATURAL SCIENCES

These activities cover the following fields: arid lands; the humid tropical zone; marine sciences; cell biology; the peaceful uses of atomic energy; new sources of energy; extra-territorial space; and the processing of scientific data.

The exchange of ideas and results is encouraged by congresses and documentation, and the award of grants for study tours and missions. More concrete action was provided in the specific subjects mentioned above. Three main methods have been devised to produce the desired results. The first is to establish for each subject a new intergovernmental body, whether regional or international, which conducts its scientific work on its own initiative. The European Organisation for Nuclear Research and the International Computation Centre are examples of bodies of this kind. The second is to set up, within Unesco itself, an administrative co-ordinating body which possesses certain financial resources and acts on the scientific advice of a group of experts selected for that purpose: an example is provided by the new Inter-Governmental Oceanographic Commission set up in 1961, with a permanent staff within the Secretariat to service it. The third is to provide assistance for the establishment and operation of a non-governmental body responsible for achieving the co-operation desired, e.g. the International Brain Research Organisation set up in 1960.

Advisory Committees of experts of world-wide repute have been set up to administer the Arid Zone, the Marine Sciences and Humid Tropics Research Projects. Financial assistance has been granted to the International Astronomical Union and the International Geophysical Year organisation. Sometimes entirely new organisations have come into being following studies made by the Secretariat. Examples are the Federation of Astronomical and Geophysical Services and the International Centre for Laboratory Animals.

General advice has also been given by short-term missions on the establishment of national scientific research centres.

The most important activity has been the creation *in toto* of institutions and services previously almost non-existent. It has been possible in this way to strengthen geophysical and seismological observatories, and geological and hydro-geological services.

Co-operation has commenced with the FAO projects for studying the world's resources of fish, as a source of food supply, and with the United Nations and several non-Governmental bodies over problems connected with the scientific exploration of outer space.

6. APPLIED SOCIAL SCIENCES

The Social Science programme makes a clear distinction between the promotion of pure research and learning in the field of the social sciences and the use of the social sciences for solving social problems. The promotion of original research has also taken place into the attitudes of the people of one country towards people of other countries, into race prejudice and into the roots of tension in local communities within different societies.

One project has been the study of the integration of immigrants into a new cultural environment. Another was directed at finding a solution to the tensions accompanying technological change. There has been a rapid increase in work on the Social Implications of Industrialisation and Technological Change, including urbanization. The latter activity now represents over 80 per cent of Unesco's work in this field. Two other projects concern the development of techniques of evaluation of the results of programmes of economic development and the study of analysis of selected aspects of society in countries whose social and economic systems or stages of development differ.

7. PRESERVATION OF THE CULTURAL HERITAGE OF MANKIND

Activity in this section is directed to the conservation and protection of the world's inheritance of books, works of art and monuments of history and science. Encouragement is also given to the exchange of publications,objects of artistic and scientific interest and other materials of information.

The protection of cultural property, historic monuments and of museum objects, archives, libraries, etc. during war is sought through the International Convention for the Protection of Cultural Property in the Event of Armed Conflict, signed at The Hague in 1954. Fifty Member States are parties to this Convention.

An International Centre for the Study of the Preservation and Restoration of Cultural Property has been established in Rome. A manual on the protection of cultural property has been published which deals with techniques for preservation and conservation. Since 1955, missions have advised on the preservation of culture in Peru, Yugoslavia, the Lebanon, Syria, Iraq, Israel, Egypt, Jordan, Iran, Pakistan, Afghanistan, Ecuador and the Sudan. International Seminars on Arts and Education have also been held since 1950 and two International Societies have been launched—one for Education through Art and the other for Music Education.

Since June, 1959, UNESCO has sent experts and financial aid to the Governments of the U.A.R. (Egypt) and the Sudan, in an effort to protect or transport to new sites the monuments and archæological sites of Nubia. These are being threatened by the building of the Aswan High Dam, which will by 1964 raise the water level over nearly 300 miles of Egyptian and Sudanese territory. An international appeal was launched in February, 1960, for this work, and a number of countries have sent archaeological teams to the area. By June 1963 sufficient money had been raised to go forward with a Swedish plan to reassemble the Abu Simbel temples on a new site out of danger from the rising flood waters of the dam. The work is expected to last until 1969.

8. MUTUAL APPRECIATION OF CULTURAL VALUES

The aim is to encourage a better mutual knowledge of the cultures of different peoples. In this way it is hoped to lay the foundations of real international understanding necessary for maximum peaceful co-operation among peoples.

CC-0. Agamnigam Digital Presevation Foundation, Chandigarh

The ninth session of Unesco's General Conference (New Delhi, 1956) established a ten-year major project aimed at developing the "Mutual Appreciation of Eastern and Western Cultural Values". The scheme aims to break down the barriers to the flow of information and ideas between the orient and occident. It has stimulated a very large number of cultural activities of an exchange nature throughout the world.

Unesco appointed a Commission in 1951 to prepare the publication of a history of the scientific and cultural development of mankind. The first two volumes, dealing with pre- and proto-history, were published in London in May 1963. A quarterly *Journal of World History* is published by the Commission.

The department sponsors international circulation of masterpieces of the visual arts and of music. Exhibitions of reproductions representing the great periods of both Western and Eastern art are circulating in Member States.

The Unesco *World Art Series* albums, devoted to works of art not sufficiently known outside their countries of origin, are published in five languages. Catalogues listing high quality reproductions of paintings of all periods have been published for the guidance of students, teachers and the general public.

Under the auspices of the International Music Council a collection has been made of recordings of traditional and contemporary music of all continents.

Great works representative of the genius of different people are translated and published. Translations of works from twenty-six different literatures have so far been made, chiefly into English and French.

9. FREE FLOW OF INFORMATION

Among the principal methods used are: sponsorship of international agreements; proposals to reduce telecommunication, postal, transport and tariff obstacles to the flow of information; administration of coupon schemes designed to overcome currency barriers; action to improve the techniques and expand the means of communication; the publication of reports and studies focusing public attention on obstacles to the free flow of information.

The underlying reason for Unesco's action in this field is that the dearth of communication facilities in large areas of the world, a maze of non-political restrictions and the high cost of sending information from country to country constitute formidable obstacles to the creation of an enlightened public opinion. In short, it appears that nearly 60 per cent of the world's peoples lack the means of being adequately informed of developments at home, let alone in other countries. For millions of people freedom of information, guaranteed by the universal Declaration of Human Rights, is far from being a reality.

Here are some of the results achieved:

1. Two international Agreements have been sponsored by Unesco: the Agreement on the Importation of Educational, Scientific and Cultural Materials and the Agreement for Facilitating the International Circulation of Visual and Auditory Materials of an Educational, Scientific and Cultural Character.

2. Proposals have been submitted to international conferences in the telecommunication, postal, transport and trade fields. Substantial concessions have been made in the rates and facilities offered.

3. Studies have been published such as *World Communications, Books for All, Trade Barriers to Knowledge* and *Transmitting World News*, which have spurred national efforts to reduce obstacles to the flow of information.

4. Member States have taken steps to facilitate the movement of persons engaged in educational, scientific and cultural activities.

5. Unesco's Coupon Schemes have helped to remove currency conversion obstacles, enabling individuals or organisations to purchase foreign books, films and other information materials and to pay for educational travel abroad.

Unesco has also provided limited direct aid and planned and conducted a series of seminars and experimental activities designed to improve the professional competence of those working in the mass media. Aid missions have been sent to Pakistan, for example, to assist in the expansion of its broadcasting network, to Israel to assist in developing film laboratories, to Libya to advise on the setting up of a national broadcasting service, to Costa Rica to advise on the creation of a television service, to Afghanistan to help in the organisation of printing shops, and to the Sudan to develop educational broadcasting.

Unesco has also organised meetings of television and radio producers and regional training courses in broadcasting techniques. It has sought to promote the establishment of regional centres for the training of teachers of journalism. The first such centre began operating in 1951 at Strasbourg University, and a second centre was opened in Ecuador in 1960. Others are planned for Asia and Africa.

Tariff, postal and transport revenues waived each year as a result of action taken by Unesco are already at least equal in amount to the Organisation's total annual budget. Member States have also simplified administrative procedures affecting the international circulation of educational materials. Some $30,000,000 has been made available by Unesco's Coupon Schemes for the importation of books, films and scientific equipment.

10. "STUDY ABROAD"—THE INTERNATIONAL TRAINING OF SPECIALISTS

The programme has been carried out through three main lines of activity:

1. A programme of documentation to reveal the extent and nature of activities of governments and other agencies in the field.

2. A programme to improve the planning and administration of international training programmes.

3. A programme of training specialists in Unesco fields of interest, through awards of fellowships for study abroad, and the organisation of special courses and other measures.

Statistical documentation on foreign students in institutions of higher learning provided by Unesco has given governments and other agencies more complete information than has ever before been available on the scale of international training and study opportunities. New approaches to the appraisal of needs for international training have been developed. Work has also advanced on developing an evaluative approach to the actual administration of programmes, so that planners and administrators may develop certain simple techniques by which to judge the effectiveness of their planning and administration, and the ultimate results of their work. Since 1948 almost 2,500 fellowships have been awarded in various fields for periods of study abroad. These fellowships have enabled persons, who are already specialists in their field, to obtain additional general or technical training abroad for periods of four to nine months—longer in exceptional cases. Fellowships have played an important role in training local "counterparts" to take over responsibilities from experts sent abroad for limited periods.

CC-0. Agamnigam Digital Presevation Foundation, Chandigarh

In some countries field experts have organised training centres and courses as a means of passing on their specialised knowledge to nationals of the countries concerned. The international centres operated in Mexico and Egypt have endeavoured to develop complete cadres of Fundamental Education and community development specialists. The Major Project on the Extension of Primary Education in Latin America places high priority on training of educational specialists and supervisory personnel. In Yugoslavia, over 100 educational leaders, associated with the current Yugoslav programme of educational reform, have been given opportunities for comparative studies of methods used abroad.

Continuing efforts are made by Unesco to keep in touch with former fellows and there is much evidence to show that many former fellows are making valuable contributions, through the introduction of new techniques and knowledge, to the projects for which they have been trained.

11. HUMAN RIGHTS

The universal rights (United Nations Declaration of Human Rights, 1948) of all individuals to education, an enjoyment of the arts and to a share in scientific advancement and its benefits, come directly within Unesco's competence. In addition to efforts already outlined, Unesco has, in this field, secured the Universal Copyright Convention (signed by 40 States, Geneva, 1952), and at the present time 55 States are parties to this instrument which came into force on September 16th, 1955. A series of reports has been prepared on the subject of education for women, and studies have been made of the role of educated women in Africa and Asia. The General Conference, at its eleventh session (Paris, 1960), adopted a Convention and Recommendation against discrimination in education, which came into force on May 22nd, 1962. France and Israel deposited instruments of ratification in 1961, and 13 other countries, including the United Kingdom and U.S.S.R., did so in 1962, bringing the total number of states party to it to 15.

OTHER PROGRAMMES

1. EXPANDED PROGRAMME OF TECHNICAL ASSISTANCE

Unesco, like the other major specialised agencies, has been a participant since 1954 in the United Nations Expanded Programme of Technical Assistance for economic development, under which experts are sent to requesting countries, fellowships granted and other facilities provided to assist these countries in framing and implementing measures of economic development. In 1962 Unesco's share (about 16 per cent) of the total funds amounted to $6,900,000, which paid for over 400 experts (mostly in education or science) in some 60 countries and territories, 300 fellowships to nationals of assisted countries, and a small amount of demonstration equipment and supplies. There are also some regional projects covering a group of countries, several of them operated in collaboration with the United Nations or other agencies.

2. PARTICIPATION PROGRAMME

The United Nations Expanded Programme can only finance projects clearly aimed at economic development, and this definition excludes certain Unesco objectives, e.g. in the fields of the social sciences, cultural activities, etc., in regard to which Member States have sought the organisation's direct assistance. Accordingly there was launched in 1956 a "Participation" programme under which a fraction of Unesco's total budget is set aside for direct assistance given on request to Member States. Some $1,120,000 became available in 1962 for this purpose, and this has been allocated to meet requests originating from 75 countries and territories and should finance 18 regional projects involving several countries each. Apart from aid in the educational and scientific fields the subjects covered include social science teaching, the preservation and restoration of monuments, the development of libraries and museums, the development of communication facilities, public administration, arts and crafts, etc.

3. UNITED NATIONS SPECIAL FUND

As a complement to the Expanded Programme of Technical Assistance (which is mainly concerned with the provision of expert advice) the General Assembly of the United Nations set up in October 1958 a voluntary "Special Fund" designed to finance major undertakings calculated to promote economic development in under-developed countries. The initial target of $150,000,000 will shortly be reached. Here again Unesco is a participating agency and has now been given responsibility for 48 projects in all parts of the world, for a total cost of $52 million spread over five years. The fields covered are teacher-training (secondary, technical and vocational), training of technicians and applied scientific research. Teacher-training at the secondary level is largely concentrated in Africa, where the need is greatest, and the tendency of the Special Fund authorities is towards increased liberality in this field. In addition, it has been proposed that criteria for Special Fund programmes be further extended to include women's education and assistance to the training of primary school teachers in countries where the shortcomings of primary education constitute a serious handicap to economic development.

4. OTHER INTERNATIONAL ACCOUNTS

An immediate and generous response followed appeals made by the Organisation for specific purposes: (1) The International Campaign for Safeguarding the Monuments of Nubia to which the United States Government has promised to meet one-third of the total cost and to which 43 Member States have contributed or promised to contribute a total of some $77 million in addition to the $11.5 million set aside for this purpose by the United Arab Republic (Egypt). (2) Numerous scientific missions sent by Member States and private institutions, half of whose expenses are being guaranteed by the Republic of Sudan. (3) The Emergency Programme for Educational Development in Africa, launched by the General Conference at its eleventh session, whose target is four million dollars. (4) A Unesco School Construction Bureau for Africa has been established in Khartoum in co-operation with the Government of Sudan. (5) A Textbook Production Centre has been established in Yaoundé in co-operation with the Government of Cameroun. (6) Overseas teachers and professors and aid in educational planning, in the form of expert missions, are being provided to numerous African Member States.

In addition, Unesco continues to co-operate with an international aid programme launched in 1960 by the International Bank for Reconstruction and Development (IBRD) under the name of the International Development Association (IDA). Whereas the UN Special Fund (*see above*) is concerned with "pre-investment" projects (although of considerable magnitude) the IDA concentrates

CC-0. Agamnigam Digital Presevation Foundation, Chandigarh

its resources on larger scale projects of an operational nature. The General Conference at its eleventh session authorised the Director-General to collaborate with the Association "by advising Member States on projects which might suitably be presented to IDA for loans, by advising IDA on projects within the sphere of Unesco's competence for which loans are being considered" and "by assisting Member States in the preparation and presentation of requests to IDA."

A $5 million credit was extended to Tunisia in September 1962 for secondary and technical school construction, and some 12 other projects are under consideration.

ORGANISATION

1. General Conference. Meets in ordinary session once in two years and is composed of representatives of the Member States. The twelfth session was held in November/December 1962 at the permanent Headquarters in Paris.

2. Executive Board. Consists of 30 members elected for a 4-year term. Prepares the programme to be submitted to the Conference and supervises its execution. The sixty-fifth session of the Board took place in Paris in May 1963.

3. Secretariat. The Director-General and an international staff of more than 500 professional civil servants drafted from 67 countries.

Co-operating Bodies. In addition to the structure of UNESCO, as outlined above, National Commissions or co-operating bodies have been set up in most of the Member States of UNESCO. These Commissions, which are intended to bring together within each country government officials and the principal non-governmental bodies interested in educational, scientific and cultural matters (*see below*, Constitution, Article VII), help to integrate the individual efforts in Member States with the work of the Organisation and to act in an advisory capacity to their governments in matters relating to the Organisation.

The number of Member States of UNESCO as at October 1st, 1963, was 113. The last country to join was Uganda.

MEMBERS OF THE EXECUTIVE BOARD 1963–1964

Chair. H.E. Dr. C. Edward Beeby (New Zealand); Vice-Chair. H.E. Dr. Albert Rakato-Ratsimamanga (Malagasy Republic), S. M. Sharif (Pakistan), H.E. CONSTITUTION

London, November 16th, 1945

The Governments of the States parties to this Constitution on behalf of their peoples declare:

That since wars begin in the minds of men, it is in the minds of men that the defences of peace must be constructed;

That ignorance of each other's ways and lives has been a common cause, throughout the history of mankind, of that suspicion and mistrust between the peoples of the world through which their differences have all too often broken into war;

That the great and terrible war which has now ended was a war made possible by the denial of the democratic principles of the dignity, equality, and mutual respect of men, and by the propagation, in their place, through ignorance and prejudice, of the doctrine of the inequality of men and races;

That the wide diffusion of culture, and the education of humanity for justice and liberty and peace are indispensable to the dignity of man and constitute a sacred duty which all the nations must fulfil in a spirit of mutual assistance and concern;

That a peace based exclusively upon the political and economic arrangements of governments would not be a peace which could secure the unanimous, lasting, and sincere support of the peoples of the world, and that the peace must therefore be founded, if it is not to fail, upon the intellectual and moral solidarity of mankind.

For these reasons, the States parties to this Constitution, believing in full and equal opportunities for education for all, in the unrestricted pursuit of objective truth, and in the free exchange of ideas and knowledge, are agreed and determined to develop and to increase the means of communication between their peoples and to employ these means for the purposes of mutual understanding and a truer and more perfect knowledge of each other's lives.

In consequence whereof they do hereby create the United Nations Educational, Scientific, and Cultural Organisation for the purpose of advancing, through the educational and scientific and cultural relations of the peoples of the world, the objectives of international peace and of the common welfare of mankind for which the United Nations Organisation was established and which its Charter proclaims.

Article I

Purposes and Functions

1. The purpose of the Organisation is to contribute to peace and security by promoting collaboration among the nations through education, science, and culture in order to further universal respect for justice, for the rule of law, and for the human rights and fundamental freedoms which are affirmed for the peoples of the world, without distinction of race, sex, language, or religion, by the Charter of the United Nations.

2. To realise this purpose the Organisation will:

(*a*) Collaborate in the work of advancing the mutual knowledge and understanding of peoples, through all means of mass communication, and to that end recommend such international agreements as may be necessary to promote the free flow of ideas by word and image;

(*b*) Give fresh impulse to popular education and to the spread of culture:

by collaborating with Members, at their request, in the development of educational activities;

by instituting collaboration among the nations to advance the ideal of equality of educational opportunity without regard to race, sex, or any distinctions, economic or social;

by suggesting educational methods best suited to prepare the children of the world for the responsibilities of freedom;

(*c*) Maintain, increase, and diffuse knowledge:

by assuring the conservation and protection of the world's inheritance of books, works of art, and monuments of history and science, and recommending to the nations concerned the necessary international conventions;

by encouraging co-operation among the nations in all branches of intellectual activity, including the international exchange of persons active in the fields of education, science, and culture and the exchange of publications, objects of artistic and scientific interest, and other materials of information;

by initiating methods of international co-operation calculated to give the people of all countries access to the printed and published materials produced by any of them.

3. With a view to preserving the independence, integrity, and fruitful diversity of the cultures and educational systems of the States Members of this Organisation, the Organisation is prohibited from intervening in matters which are essentially within their domestic jurisdiction.

Article II

Membership

1. Membership of the United Nations Organisation shall carry with it the right to membership of the United Nations Educational, Scientific, and Cultural Organisation.

2. Subject to the conditions of the agreement between this Organisation and the United Nations Organisation, approved pursuant to Article X of this Constitution, States not members of the United Nations Organisation may be admitted to membership of the Organisation, upon recommendation of the Executive Board, by a two-thirds majority vote of the General Conference.

3. Territories or groups of territories which are not responsible for the conduct of their international relations may be admitted as Associate Members by the General Conference by a two-thirds majority of Members present and voting, upon application made on behalf of such territory or group of territories by the Member or other authority having responsibility for their international relations. The nature and extent of the rights and obligations of Associate Members shall be determined by the General Conference.

4. Members of the Organisation which are suspended from the exercise of the rights and privileges of membership of the United Nations Organisation, shall, upon the request of the latter, be suspended from the rights and privileges of this Organisation.

5. Members of the Organisation which are expelled from the United Nations Organisation shall automatically cease to be members of this Organisation.

6. Any Member State or Associate Member of the Organisation may withdraw from the Organisation by notice addressed to the Director-General. Such notice shall take effect on December 31st of the year following that during which the notice was given. No such withdrawal shall affect the financial obligations owed to the Organisation

CC-0. Agamnigam Digital Presevation Foundation, Chandigarh

on the date the withdrawal takes effect. Notice of withdrawal by an Associate Member shall be given on its behalf by the Member State or other authority having responsibility for its international relations.

Article III

Organs

The Organisation shall include a General Conference, an Executive Board, and a Secretariat.

Article IV

The General Conference

(*a*) *Composition*

1. The General Conference shall consist of the representatives of the States Members of the Organisation. The Government of each Member State shall appoint not more than five delegates, who shall be selected after consultation with the National Commission, if established, or with educational, scientific, and cultural bodies.

(*b*) *Functions*

2. The General Conference shall determine the policies and the main lines of work of the Organisation. It shall take decisions on programmes drawn up by the Executive Board.

3. The General Conference shall, when it deems it desirable, summon international conferences on education, the sciences, and humanities, and the dissemination of knowledge; non-governmental conferences on the same subjects may be summoned by the General Conference or by the Executive Board in accordance with such regulations.

4. The General Conference shall, in adopting proposals for submission to the Member States, distinguish between recommendations and international conventions submitted for their approval. In the former case a majority vote shall suffice; in the latter case a two-thirds majority shall be required. Each of the Member States shall submit recommendations or conventions to its competent authorities within a period of one year from the close of the session of the General Conference at which they were adopted.

5. Subject to the provisions of Article V, para. 5 (iii), the General Conference shall advise the United Nations Organisation on the educational, scientific, and cultural aspects of matters of concern to the latter, in accordance with the terms and procedure agreed upon between the appropriate authorities of the two Organisations.

6. The General Conference shall receive and consider the reports submitted periodically by Member States as provided by Article VIII.

7. The General Conference shall elect the members of the Executive Board, and, on the recommendation of the Board, shall appoint the Director-General.

(*c*) *Voting*

8. (i) Each Member State shall have one vote in the General Conference. Decisions shall be made by a simple majority except in cases in which a two-thirds majority is required by the provisions of this Constitution or of the Rules of Procedure of the General Conference. A majority shall be a majority of the Members present and voting.

(ii) A Member State shall have no vote in the General Conference if the total amount of contributions due from it exceeds the total amount of contributions payable by it for the current year and the immediately preceding calendar year.

(iii) The General Conference may nevertheless permit such a Member State to vote, if it is satisfied that the failure to pay is due to conditions beyond the control of the Member Nation.

(*d*) *Procedure*

9. (i) The General Conference shall meet in ordinary session every two years. It may meet in extraordinary session if it decides to do so itself or if summoned by the Executive Board, or on the demand of at least one-third of the Member States.

(ii) At each session the location of its next ordinary session shall be designated by the General Conference. The location of an extraordinary session shall be decided by the General Conference if the session is summoned by it, or otherwise by the Executive Board.

10. The General Conference shall adopt its own rules of procedure. It shall at each session elect a President and other officers.

11. The General Conference shall set up special and technical committees and such other subordinate bodies as may be necessary for its purposes.

12. The General Conference shall cause arrangements to be made for public access to meetings, subject to such regulations as it shall prescribe.

(*e*) *Observers*

13. The General Conference, on the recommendation of the Executive Board and by a two-thirds majority, may, subject to its rules of procedure, invite as observers at specified sessions of the Conference or of its commissions representatives of international organisations, such as those referred to in Article XI, paragraph 4.

14. When consultative arrangements have been approved by the Executive Board for such international non-governmental or semi-governmental organisations in the manner provided in Article XI, paragraph 4, those organisations shall be invited to send observers to sessions of the General Conference and its Commissions.

Article V

Executive Board

(*a*) *Composition*

1. The Executive Board shall be elected by the General Conference from among the delegates appointed by the Member States and shall consist of twenty-two members, each of whom shall represent the Government of the State of which he is a national. The President of the General Conference shall sit *ex officio* in an advisory capacity on the Executive Board.

2. In electing the members of the Executive Board the General Conference shall endeavour to include persons competent in the arts, the humanities, the sciences, education, and the diffusion of ideas, and qualified by their experience and capacity to fulfil the administrative and executive duties of the Board. It shall also have regard to the diversity of cultures and a balanced geographical distribution. Not more than one national of any Member State shall serve on the Board at any one time, the President of the Conference excepted.

3. Members of the Board shall serve from the close of the session of the General Conference which elected them until the close of the second ordinary session of the General Conference following that election. They shall be immediately eligible for a second term, but shall not serve consecutively for more than two terms. Half of the members of the Board shall be elected every two years.

4. In the event of the death or resignation of a member of the Executive Board, his replacement for the remainder of his term shall be appointed by the Executive Board on the nomination of the Government of the State the former represented. The Government making the nomination and the Executive Board shall have regard to the factors set forth in paragraph 2 of this Article.

CC-0. Agamnigam Digital Presevation Foundation, Chandigarh

(*b*) *Functions*

5 (i) The Executive Board shall prepare the Agenda for the General Conference. It shall examine the programme of work for the Organisation and corresponding Budget Estimates submitted to it by the Director-General in accordance with paragraph 3 of Article VI and shall submit them with such recommendations as it considers desirable to the General Conference.

(ii) The Executive Board, acting under the authority of the General Conference, shall be responsible for the execution of the programme adopted by the Conference. In accordance with the decisions of the General Conference and having regard to circumstances arising between two ordinary sessions, the Executive Board shall take all necessary measures to ensure the effective and rational execution of the programme by the Director-General.

(iii) Between ordinary sessions of the General Conference, the Board may discharge the functions of adviser to the United Nations, set forth in Article IV, paragraph 5, whenever the problem upon which advice is sought has already been dealt with in principle by the Conference, or when the solution is implicit in decisions of the Conference.

6. The Executive Board shall recommend to the General Conference the admission of new Members to the Organisation.

7. Subject to decisions of the General Conference, the Executive Board shall adopt its own rules of procedure. It shall elect its officers from among its members.

8. The Executive Board shall meet in regular session at least twice a year and may meet in special session if convoked by the Chairman on his own initiative or upon the request of six members of the Board.

9. The Chairman of the Executive Board shall present, on behalf of the Board, to each ordinary session of the General Conference, with or without comments, the reports on the activities of the Organisation which the Director-General is required to prepare in accordance with the provisions of Article VI, 3*b*.

10. The Executive Board shall make all necessary arrangements to consult the representatives of international organisations or qualified persons concerned with questions within its competence.

11. Between sessions of the General Conference, the Executive Board may request advisory opinions from the International Court of Justice on legal questions arising within the field of the Organisation's activities.

12. Although the members of the Executive Board are representative of their respective Governments they shall exercise the powers delegated to them by the General Conference on behalf of the Conference as a whole.

The term of office of the members of the Executive Board during the eighth session of the General Conference shall end at the close of the eighth session of the General Conference. At the eighth session of the General Conference, twenty-two members shall be elected to the Executive Board pursuant to the provisions of this Article, of whom one-half shall retire at the close of the ninth session of the General Conference, the retiring members being chosen by the drawing of lots. Thereafter, eleven members shall be elected at each ordinary session of the General Conference.

Article VI

Secretariat

1. The Secretariat shall consist of a Director-General and such staff as may be required.

2. The Director-General shall be nominated by the Executive Board and appointed by the General Conference for a period of six years, under such conditions as the Conference may approve, and shall be eligible for reappointment. He shall be the chief administrative officer of the Organisation.

3. (*a*) The Director-General, or a deputy designated by him, shall participate, without the right to vote, in all meetings of the General Conference, of the Executive Board, and of the Committees of the Organisation. He shall formulate proposals for appropriate action by the Conference and the Board, and shall prepare for submission to the Board a draft programme of work for the Organisation with corresponding budget estimates.

(*b*) The Director-General shall prepare and communicate to Member States and to the Executive Board periodical reports on the activities of the Organisation. The General Conference shall determine the periods to be covered by these reports.

4. The Director-General shall appoint the staff of the Secretariat in accordance with staff regulations to be approved by the General Conference. Subject to the paramount consideration of securing the highest standards of integrity, efficiency, and technical competence, appointment to the staff shall be on as wide a geographical basis as possible.

5. The responsibilities of the Director-General and of the staff shall be exclusively international in character. In the discharge of their duties they shall not seek or receive instructions from any Government or from any authority external to the Organisation. They shall refrain from any action which might prejudice their position as international officials. Each State Member of the Organisation undertakes to respect the international character of the responsibilities of the Director-General and the staff, and not to seek to influence them in the discharge of their duties.

6. Nothing in this Article shall preclude the Organisation from entering into special arrangements within the United Nations Organisation for common services and staff and for the interchange of personnel.

Article VII

National Co-operating Bodies

1. Each Member State shall make such arrangements as suit its particular conditions for the purpose of associating its principal bodies interested in educational, scientific, and cultural matters with the work of the Organisation, preferably by the formation of a National Commission broadly representative of the Government and such bodies.

2. National Commissions or national co-operating bodies, where they exist, shall act in an advisory capacity to their respective delegations to the General Conference and to their Governments in matters relating to the Organisation, and shall function as agencies of liaison in all matters of interest to it.

3. The Organisation may, on the request of a Member State, delegate, either temporarily or permanently, a member of its Secretariat to serve on the National Commission of that State, in order to assist in the development of its work.

Article VIII

Reports by Member States

Each Member State shall report periodically to the Organisation, in a manner to be determined by the General Conference, on its laws, regulations, and statistics relating to educational, scientific, and cultural life and institutions, and on the action taken upon the recommendations and conventions referred to in Article IV, paragraph 4.

CC-0. Agamnigam Digital Presevation Foundation, Chandigarh

Article IX

Budget

1. The budget shall be administered by the Organisation.

2. The General Conference shall approve and give final effect to the budget and to the apportionment of financial responsibility among the States Members of the Organisation subject to such arrangement with the United Nations as may be provided in the agreement to be entered into pursuant to Article X.

3. The Director-General, with the approval of the Executive Board, may receive gifts, bequests, and subventions directly from Governments, public and private institutions, associations, and private persons.

Article X

Relations with the United Nations Organisation

This Organisation shall be brought into relation with the United Nations Organisation, as soon as practicable, as one of the specialised agencies referred to in Article 57 of the Charter of the United Nations. This relationship shall be effected through an agreement with the United Nations Organisation under Article 63 of the Charter, which agreement shall be subject to the approval of the General Conference of this Organisation. The agreement shall provide for effective co-operation between the two Organisations in the pursuit of their common purposes, and at the tame time shall recognise the autonomy of this Organisasion within the fields of its competence as defined in this Constitution. Such agreement may, among other matters, provide for the approval and financing of the budget of the Organisation by the General Assembly of the United Nations.

Article XI

Relations with other Specialised International Organisations and Agencies

1. This Organisation may co-operate with other specialised inter-governmental organisations and agencies whose interests and activities are related to its purposes. To this end the Director-General, acting under the general authority of the Executive Board, may establish effective working relationships with such organisations and agencies and establish such joint committees as may be necessary to assure effective co-operation. Any formal arrangements entered into with such organisations or agencies shall be subject to the approval of the Executive Board.

2. Whenever the General Conference of this Organisation and the competent authorities of any other specialised inter-governmental organisations or agencies whose purposes and functions lie within the competence of this Organisation deem it desirable to effect a transfer of their resources and activities to this Organisation, the Director-General, subject to the approval of the Conference, may enter into mutually acceptable arrangements for this purpose.

3. This Organisation may make appropriate arrangements with other inter-governmental organisations for reciprocal representation at meetings.

4. The United Nations Educational, Scientific, and Cultural Organisation may make suitable arrangements for consultation and co-operation with non-governmental international organisations concerned with matters within its competence, and may invite them to undertake specific tasks. Such co-operation may also include appropriate participation by representatives of such organisations on advisory committees set up by the General Conference.

Article XII

Legal Status of the Organisation

The provisions of Articles 104 and 105 of the Charter of the United Nations Organisation concerning the legal status of that Organisation, its privileges, and immunities, shall apply in the same way to this Organisation.

Article XIII

Amendments

1. Proposals for amendments to this Constitution shall become effective upon receiving the approval of the General Conference by a two-thirds majority; provided, however, that those amendments which involve fundamental alterations in the aims of the Organisation or new obligations for the Member States shall require subsequent acceptance on the part of two-thirds of the Member States before they come into force. The draft texts of proposed amendments shall be communicated by the Director-General to the Member States at least six months in advance of their consideration by the General Conference.

2. The General Conference shall have power to adopt, by a two-thirds majority, rules of procedure for carrying out the provisions of this Article.

Article XIV

Interpretation

1. The English and French texts of this Constitution shall be regarded as equally authoritative.

2. Any question or dispute concerning the interpretation of this Constitution shall be referred for determination to the International Court of Justice or to an arbitral tribunal, as the General Conference may determine under its rules of procedure.

Article XV

Entry into Force

1. This Constitution shall be subject to acceptance. The instruments of acceptance shall be deposited with the Government of the United Kingdom.

2. This Constitution shall remain open for signature in the archives of the Government of the United Kingdom. Signature may take place either before or after the deposit of the instrument of acceptance. No acceptance shall be valid unless preceded or followed by signature.

3. This Constitution shall come into force when it has been accepted by twenty of its signatories. Subsequent acceptances shall take effect immediately.

4. The Government of the United Kingdom will inform all members of the United Nations of the receipt of all instruments of acceptance and of the date on which the Constitution comes into force in accordance with the preceding paragraph.

In faith whereof, the undersigned, duly authorised to that effect, have signed this Constitution in the English and French languages, both texts being equally authentic.

Done in London the sixteenth day of November, 1945, in a single copy, in the English and French languages, of which certified copies will be communicated by the Government of the United Kingdom to the Governments of all the Members of the United Nations.

INTERNATIONAL COUNCIL OF SCIENTIFIC UNIONS

International Council of Scientific Unions (*Conseil international des unions scientifiques*), via Sebenico, Rome, Italy.

The ICSU was founded in 1931, succeeding the International Research Council founded in 1919 to co-ordinate international efforts in the different branches of science and its applications; to initiate the formation of international associations or unions deemed to be useful to the progress of science; to enter into relations with the governments of the countries adhering to the Council in order to promote investigations falling within the competence of the Council. Adhering organisations represent 49 countries and 14 international unions. In December 1946 an agreement was signed between UNESCO and the ICSU recognising the latter as the co-ordinating and representative body of international scientific unions.

UNIONS FEDERATED TO THE ICSU

International Astronomical Union (*Union astronomique internationale*), Royal Greenwich Observatory, Herstmonceux Castle, Hailsham, Sussex, England; f. 1919. Object: To facilitate co-operation between the astronomers of various countries and to further the study of astronomy in all its branches; 42 countries are affiliated, there are 1,300 individual members. Its next General Assembly will be held in 1964 in Hamburg.

Pres. Prof. V. A. Ambartsumian (Pres. Academy of Sciences of the Armenian S.S.R., Erevan, Armenia); Sec.-Gen. D. H. Sadler (Royal Greenwich Observatory, Hailsham, Sussex, England). Publs. *Transactions of the International Astronomical Union* and *Symposia organised by the International Astronomical Union.*

International Geographical Union (IGU) (*Union géographique internationale*); f. 1923. Objects: To encourage the study of problems relating to geography, to promote and co-ordinate research requiring international co-operation, and to organise international congresses and commissions; 51 mem. countries.

Pres. Prof. C. Troll (Germany); Sec.-Treas. Prof. Hans Boesch, Freiestrasse 30, Zürich 32, Switzerland.

International Mathematical Union, Tata Institute of Fundamental Research, Colaba 5, Bombay, India, Business office: Eidgenössische Technische Hochschule, Zürich, Switzerland; f. 1952 by a convention of delegates of national committees representing 22 countries which met in New York. Objects: To promote international co-operation in mathematics; to support and assist the International Congress of Mathematicians and other international scientific meetings or conferences; to encourage and support other international mathematical activities considered likely to contribute to the development of mathematical science in any of its aspects—pure, applied, or educational; 38 mem. countries.

Exec. Cttee.: Pres. Prof. G. de Rham; Vice-Pres. H. Cartan, K. Kuratowski; Sec. K. Chandrasekharan; mems. J. C. Burkill, F. Hirzebruch, M. A. Lavrenbiev, D. Montgomery, B. Segre, R. Nevanlinna.

International Scientific Radio Union (*Union radio scientifique internationale*), 7 Place Emile Danco, Brussels 18; f. 1920 Objects: to develop scientific studies connected with radioelectricity, and especially (*a*) to promote and organise research necessitating international co-operation, and to facilitate the discussion and publication of the results of this research, and (*b*) to facilitate the establishment of common radio measurements and standards. There are 28 national committees.

Pres. Dr. R. L. Smith-Rose (U.K.); Sec.-Gen. E. Herbays (Brussels). Publs. *Proceedings of General Assemblies of the URSI, Information Bulletin* (bi-monthly), *Special Reports, Proceedings of Meetings of Mixed Commissions: (a) on the Ionosphere, (b) on Radio-Meteorology, Ionospheric Stations Manual.*

International Union of Biochemistry (*Union internationale de biochimie*), Secretariat: Dept. of Chemical Pathology, Guy's Hospital Medical School, London, S.E.1; f. 1955. Objects: (*a*) to encourage the continuance of a series of International Congresses of Biochemistry, (*b*) to promote international co-ordination of research, discussion and publication, (*c*) to organise a permanent co-operation between the societies representing biochemistry in

CC-0. Agamnigam Digital Presevation Foundation, Chandigarh

the adherent countries, and (*d*) to contribute to the advancement of biochemistry in all its international aspects. Twenty-seven member countries. The last meeting of the Union took place in Moscow (August 1961).

Pres. Prof. S. OCHOA (U.S.A.); Treas. Prof. E. H. STOTZ (U.S.A.); Sec.-Gen. Prof. R. H. S. THOMPSON (Great Britain).

International Union of Biological Sciences (*Union internationale des sciences biologiques*); f. 1919. Object: The promotion of international co-operation in biology. Thirty-four countries are represented.

Pres. Prof. C. H. WADDINGTON; Sec.-Gen. Prof. G. L. STEBBINS, Dept. of Genetics, University of California, Davis, California, U.S.A.; Sec. Dr. R. ULRICH (France); Treas. Dr. J. LANJOUW (Netherlands). Publs. *News Letters, Index des Généticiens, Index des Zoologistes.*

International Union of Crystallography (*Union internationale de cristallographie*); f. 1947. Objects: To promote international co-operation in crystallography; to contribute to the advancement of crystallography in all its aspects, including related topics concerning the non-crystalline states; to facilitate international standardisation of methods, of units, of nomenclature and of symbols used in crystallography; and to form a focus for the relations of crystallography to other sciences, 26 member countries.

Pres. Prof. P. P. EWALD (U.S.A.); Gen. Sec. Dr. D. W. SMITS (Mathematical Institute, University of Groningen, Reitdiepskade 4, Groningen, Netherlands). Publs. *Acta Crystallographica* (monthly), *Structure Reports* (about one volume per annum), *International Tables for X-ray Crystallography, Fifty Years of X-ray Diffraction, World Directory of Crystallographers.*

International Union of Geodesy and Geophysics (*Union géodésique et géophysique internationale*), 140 rue de Grenelle, Paris 7, France; f. 1919. Objects: To promote the study of problems relating to the form and physics of the earth; to initiate, facilitate and co-ordinate research into, and investigation of, those problems of geodesy and geophysics which require international co-operation; to provide for discussion, comparison and publication. The Union is a federation of 7 associations representing Geodesy, Seismology and Physics of the Earth's Interior, Physical Oceanography, Volcanology, Scientific Hydrology, Meteorology and Atmospheric Physics, Geomagnetism and Aeronomy, which meet at the General Assemblies of the Union. In addition, there are Joint Committees of the various associations either among themselves or with other unions. The Union organises scientific meetings and also sponsors various permanent services, the object of which is to collect, analyse and publish geophysical data; 61 mem. countries.

Pres. V. V. BELOUSSOV (U.S.S.R.); Vice-Pres. J. BARTELS (Germany), J. KAPLAN (United States); Gen. Sec. G. LACLAVÈRE (France). Publs. *IUGG Chronicle* (monthly), *Geodetic Bulletin* (quarterly), *International Bibliography of Geodesy* (irregular), *International Seismological Summary* (yearly), *Bulletin Volcanologique* (6 monthly), *Bulletin mensuel du Bureau Central Sismologique* (monthly), *Bulletin de l'Association Internationale d'Hydrologie Scientifique* (quarterly), *International Bibliography of Hydrology, Catalogue des Volcans Actifs* (both irregular), texts of communications, *IUGG Monographs* (irregular).

International Union of Geological Sciences (*Union International des sciences géologiques*); f. 1961 as an offspring of the International Geological Congress; mems. from 48 countries.

Pres. J. M. HARRISON (Canada); Vice-Pres. I. I. GORSKI (U.S.S.R.), L. HAWKES (U.K.), T. KOBAYASHI (Japan), J. LOMBARD (France), B. C. ROY (India); Sec.-Gen. Prof. THEODOR SORGENFREI, Danmarks Geologiske Undersögelse, Tranegaardsvej 20, Hellerup, Denmark; Treas. J. A. DONS (Norway).

International Union of the History and Philosophy of Science (*Union internationale d'histoire et de philosophie des sciences*), 12 rue Colbert, Paris 2e, France; Division of Logic, Methodology and Philosophy of Science, Stanford University, Stanford, California, U.S.A.; f. 1954. Object: To act as a clearing-house for research into the history and philosophy of science and to assist directly the activities of UNESCO in this field.

Council: Pres. Prof. G. H. VON WRIGHT (Finland); Vice-Pres. Prof. V. RONCHI (Italy); Treas. Dr. D. A. WITTOP-KONING (Netherlands); Sec.-Gen. Dr. R. TATON (France). Publs. *Archives internationales d'histoire des sciences, Journal of Symbolic Logic.*

International Union of Physiological Sciences, c/o Prof. W. O. FENN, Medical Center, University of Rochester, Rochester 20, N.Y., U.S.A.; f. 1953 to encourage the series of International Congresses of Physiological Sciences (Physiology and Pharmacology); to promote further congresses; to take all action which will contribute to the development of physiological sciences; mems. national or regional physiological societies of 37 countries.

Pres. Sir LINDOR BROWN (England); Sec. Prof. W. O. FENN (U.S.A.).

International Union of Pure and Applied Chemistry (*Union internationale de chimie pure et appliquée*), Secretariat: c/o Hoffmann-Laroche & Co., S.A., Grenzacherstrasse 124, Basle 2, Switzerland; f. 1919. Object: To organise permanent co-operation between chemical associations in the member countries, to co-ordinate their scientific and technical methods and to contribute, notably by the convocation of conferences and congresses, to advancement in the whole field of chemistry. Thirty-six member countries.

Pres. W. A. NOYES, Jr. (U.S.A.); Gen. Sec. Dr. R. MORF (Switzerland); Hon. Treas. Sir E. CHARLES DODDS (Great Britain).

International Union of Pure and Applied Physics (*Union internationale de physique pure et appliquée*); f. 1922. Object: to promote and encourage international co-operation in physics. Thirty-four countries are affiliated.

Pres. Dr. H. J. BHABHA (India); Sec.-Gen. P. FLEURY (Institut d'Optique, 3 bd. Pasteur, Paris 15e, France).

International Union of Theoretical and Applied Mechanics (*Union internationale de mécanique théorique et appliquée*). The Union was created by a decision of the International Committee for the Congresses of Applied Mechanics at its meeting in Paris during the Sixth Congress, in September 1946. It formally came into existence on April 1st, 1947. The object of the Union is to form a link between persons and organisations engaged in scientific work (theoretical or experimental) in mechanics or in related sciences; to organise international meetings for subjects falling within this field; and to engage in other activities meant to promote the development of mechanics as a science; 25 mem. countries.

From November 1st, 1960 to October 31st, 1964 the Bureau of the Union consists of G. TEMPLE, Oxford (Pres.), F. K. G. ODQUIST, Stockholm (Vice-Pres.), Prof. MAURICE ROY, 55 Boulevard Malesherbes, Paris 8e, France (Sec.), W. T. KOITER, Delft (Treas.), and four other members.

CC-0. Agamkalan Digital Preservation Foundation, Chandigarh

The Union is directed by its General Assembly, which is composed of representatives of the organisations adhering to the Union and of elected members.

Tasks which fall within the sphere of activities of two or more Unions have been undertaken by the following Special Committees set up by the ICSU:

Scientific Committee on Oceanic Research (SCOR): f. 1957 to further international scientific activity in all branches of oceanic research; as a first step in this programme SCOR is engaged with UNESCO on the International Indian Ocean Expedition, begun in 1962.

Secretariat: Dr. G. Böhnecke, Neuer Wall 34, 2 Hamburg 36, German Federal Republic.

Scientific Committee on Antarctic Research (SCAR): f. 1958 to continue the co-operative scientific exploration of Antarctica after the close of the International Geophysical Year (IGY). Mems. 12 countries.

Secretariat: Dr. G. de Q. Robin, Scott Polar Research Institute, Cambridge, England.

Committee on Space Research (COSPAR): f. 1958 to continue and foster, after the end of IGY, international co-operation in all sciences that make use of the new research tools of rockets and satellites.

Pres. Prof. Maurice Roy, 55 Boulevard Malesherbes, Paris 8e, France; Vice-Pres. Academician Blagonravov (U.S.S.R.), Dr. R. W. Porter (U.S.A.); Secretariat: P. J. Beaulieu, Exec. Sec., 55 Boulevard Malesherbes, Paris 8e, France.

International Geophysical Committee (*Comité international de géophysique—CIG*), 140 rue de Grenelle, Paris 7e; f. 1959 to continue the work of the International Geophysical Year in the following fields: Meteorology, Nuclear Radiation, Aeronomy, Geomagnetism, Aurora and Airglow, Solar Activity, Ionosphere, Cosmic Rays, Oceanography, Glaciology, Seismology, Paleogeophysics; to ensure the fullest exploitation of IGY and IGC data; to maintain the efficient functioning of the IGY World Data Centres; to encourage the discussion and utilisation of IGY and IGC 1959 results, and the publication of IGY and IGC results and bibliographies; to develop and co-ordinate international plans for the furtherance of international co-operation in geophysics and related sciences especially those of an interdisciplinary nature.

Hon. Pres. Prof. S. Chapman; Pres. Prof. W. Beynon (U.K.); Vice-Pres. V. V. Beloussov (U.S.S.R.), Dr. M. A. Pomerantz (U.S.A.), Prof. G. Righini (Italy); Gen. Sec. Ing. Gen. G. R. Laclavère, 140 rue de Grenelle, Paris 7, France.

ICSU Abstracting Board: f. 1949; facilitates the prompt publication of abstracts in Physics and Chemistry and Biology; co-operates with the Institute for Scientific Information of the Academy of Sciences of the U.S.S.R.

Secretariat: Mrs. J. Poyen, Gen. Sec. ICSU Abstracting Board, 17 rue Mirabeau, Paris 16e, France.

Federation of Astronomical and Geophysical Services (FAGS): f. 1956; federates the following Permanent Services: International Time Bureau, International Polar Motion Service, Permanent Service of Geomagnetic Indices, International Gravimetric Bureau, International Seismological Summary, Monthly Bulletin of the International Seismological Bureau, International Commission of Atmospheric Ozone, Quarterly Bulletin of Solar Activity, Permanent Service of Earth Tides, International Ursigram and World Day Service, Mean Sea-Level Service.

Pres. Prof. A. Danjon (France); Vice-Pres. Ing. E. Herbays (Belgium); Sec.-Gen. Ing. Gen. G. R. Laclavère (France), 140 rue de Grenelle, Paris 7, France. Publs. *Quarterly Bulletin of Solar Activity, International Seismological Summary, Tables of Geomagnetic Indices, Bulletin Mensuel du Bureau Central International de Séismologie, Bulletin Horaire*, etc.

INTERNATIONAL COUNCIL FOR PHILOSOPHY AND HUMANISTIC STUDIES

International Council for Philosophy and Humanistic Studies, (ICPHS) (*Conseil international de la philosophie et des sciences humaines*); Headquarters: Palais des Académies, 1 rue Ducale, Brussels; Secretariat: Maison de l'UNESCO, 6 rue Franklin, Paris 16e, France; f. 1949 under the auspices of UNESCO to encourage respect for cultural autonomy by the comparative study of civilisation, to contribute towards international understanding through a better knowledge of man, to develop international co-operation in philosophy, humanistic and kindred studies, to encourage the setting up of international organisations, to promote the dissemination of information in these fields, to sponsor works of learning, etc. The Council is composed of 12 international non-governmental organisations listed below. These organisations represent 92 countries. In December 1951 an agreement was signed between UNESCO and ICPHS recognising the latter as the co-ordinating and representative body of organisations in the field of philosophy and humanistic studies.

Pres. Charles E. Odegaard (U.S.A.); Vice-Pres. F. Battaglia (Italy), Silvio Zavala (Mexico), K. Kumaniecki (Poland), T. Yamamoto (Japan); Sec.-Gen. R Syme (New Zealand); Treas. H. Hahnloser (Switzerland); Deputy Sec.-Gen. J. d'Ormesson. Publs. *Bulletin of Information* (biennally), *Diogenes* (quarterly).

Unions Federated to the ICPHS

International Academic Union (*Union académique internationale*); f. October 15th, 1919, by representatives of academic institutions from 23 states of Europe, America and Asia. Object: to promote international co-operation through collective research in philology, archaeology, moral history and political and social sciences. Affiliated countries: Australia, Austria, Belgium, Canada, Czechoslovakia, Denmark, Finland, France, Germany, Great Britain, Greece, Hungary, Italy, Japan, Mexico, The Netherlands, Norway, Poland, Rumania, Spain, Sweden, Switzerland, U.S.A., and Yugoslavia.

Pres. Prof. Rensselaer Lee (U.S.A.); Admin. Sec. Ch. Manneback, Académie Royale de Belgique, Palais des Académies, 1 rue Ducale, Brussels. Publs. Dictionaries of International Law and Medieval Latin, *Monumenta Musicae Bysantinae*, Indexes and Concordance of Muslim Tradition, Historical Documents concerning Japan, *Corpus Vasorum Antiquorum*, etc.

International Association for the History of Religions (*Association internationale pour l'histoire des religions*); f. 1950 by the 7th International Congress for the Study of the History of Religions. Object: to promote the study of the history of religions through the international collaboration of all scholars whose research has a bearing on the subject, to organise congresses and to stimulate the production of works. Thirteen member countries.

Pres. G. Widengren, Uppsala; Sec.-Gen. C. J. Bleeker, 290 Churchill-laan, Amsterdam Z, The Netherlands.

International Committee for Historical Sciences (*Comité international des sciences historiques*), Archives Cantonales, Lausanne, Switzerland; f. 1926; int. congresses since 1903 to work for the advancement of historical sciences by means of international co-ordination. Mems. in 36 countries. General assembly every two or three years.

Pres. F. H. Schmid (Austria); Sec.-Gen. Michel François (France), 270 Boulevard Raspail, Paris 14e. Publs. Congress Reports, *Bulletin d'Information* (1953-61), *Bibliographie Internationale des Sciences Historiques* (1926-39, 1946-59), *World List of Historical Periodicals and Bibliographies, Bibliographie des travaux parus en Mélanges*, Vol. I, 1885-1939, *Bibliographie de la Réforme, Histoire des Assemblées d'Etat, Répertoire des sources de l'Histoire des Mouvements Sociaux, Guia de las Personas que cultivan la Historia de America, Repertorium der diplomatischen Vertreter aller Länder, Excerpta Historica Nordica.*

International Committee on the History of Art (*Comité international d'histoire de l'art*), 3 rue Michelet, Paris 6e, France; f. 1930 by the 12th International Congress on the History of Art. Object: collaboration in the scientific study of the history of art. Mems. in 26 countries. International congress every three years.

Pres. Prof. Millard Meiss (U.S.A.); Sec.-Gen. André Chastel, Sorbonne, Paris, France; Publs. *Répertoire d'Art et d'Archéologie* (annually), *Fichier documentaire de l'Histoire de l'Art, Dictionnaire international d'Art et d'Archéologie, Corpus internationaux des peintures murales et des vitraux du Moyen Age.*

International Federation of the Societies of Classical Studies (*Fédération internationale des associations d'études classiques*), c/o Mlle J. Ernst, 11 avenue du Parc Montsouris, Paris 14e, France; f. 1948 under the auspices of UNESCO. Objects: to encourage research concerning the ancient civilisations of Greece and Rome; to group the main national associations so engaged; to ensure collaboration with relevant international organisations. Mems.: in 26 countries; affiliated bodies include the International Society for Classical Bibliography, International Society for Classical Archæology, International Society for Byzantine Studies, International Association of Papyrologists, Unione internazionale degli Istituti di Archeologia, Storia e Storia dell' Arte in Roma.

Pres. Prof. P. Romanelli (Italy); Sec. Mlle J. Ernst (Switzerland). Publs. *L'Année Philologique, Fasti Archaeologici*, other bibliographies, dictionaries, reference works, *Thesaurus Linguae Latinae, Thesaurus Linguae Graecae, Oxyrhynchus Papyri, Lustrum.*

International Federation of Modern Languages and Literatures (*Fédération internationale des langues et littératures modernes*), St. Catharine's College, Cambridge, England; f. 1928 as the International Committee on Modern Literary History; changed to its present form in 1951. Objects: to establish permanent contact between historians of literature, to develop or perfect facilities for their work and to promote the study of the history of modern literature. Eleven member associations, with members in 71 countries. Congress every three years.

Pres. 1960-63 A. C. Baugh (Pennsylvania); Sec.-Gen. S. C. Aston (Gt. Britain). Publs. *Répertoire Chronologique des littératures modernes, Acts of the Triennial Congresses.*

International Federation of Societies of Philosophy (*Fédération internationale des sociétés de philosophie*); f. 1948 under the auspices of UNESCO. Object: to encourage international co-operation in the field of philosophy, and to promote congresses, symposia and publications. Thirty-eight member countries.

Pres. Felice Battaglia (Italy); Sec.-Gen. Chaim Perelman, 32 rue de la Pêcherie, Uccle, Brussels, Belgium. Publs. An international bibliography of philosophy, *Husserliana, Chroniques de Philosophie, Dictionary of Basic Terms of Philosophy and Political Thought*, etc.

International Musicological Society (*Société internationale de musicologie*); f. 1927. Object: to promote musicological research, to encourage study in this field and to co-ordinate the work of musicologists throughout the world. Forty member countries.

Pres. Donald J. Grout (U.S.A.); Vice-Pres. Fr. Blume (Germany); Sec.-Gen. Ernst Mohr, 25 Passwangstrasse, Basle, Switzerland. Publs. An international Repertory of Musical Sources, *Acta Musicologica, Documenta Musicologica.*

International Permanent Committee of Linguists (*Comité international permanent des linguistes*); f. 1928. Object: to work for the advancement of linguistics throughout the world and to encourage international co-operation in this field. Eighteen member countries.

Pres. A. Sommerfelt (Norway); Sec.-Gen. Christine Mohrmann, 40 Sint Annastraat, Nijmegen, The Netherlands. Publs. *An International Bibliography of Linguistics, Onoma, Linguistic Atlas, a Linguistic Encyclopaedia*, etc.

International Union of Anthropological and Ethnological Sciences (*Union internationale des sciences anthropologiques et ethnologiques*); f. 1948 under the auspices of UNESCO. Object: to foster co-operation among anthropological and ethnological institutions. Fifty-two member countries (138 societies or institutes).

Pres. Prof. H. Vallois (France); Sec.-Gen. Prof. P. Bosch-Gimpera, Callejón de Olivo 84-4, Colonia Agricola, Mexico City, D.F., Mexico. Publ. *Bulletin of the International Committee on Urgent Anthropological and Ethnological Research.*

International Union of Orientalists (*Union internationale des orientalistes*); f. 1951 by the 22nd International Congress of Orientalists under the auspices of UNESCO. Object: to promote contacts between orientalists throughout the world, and to organise congresses, research and publications. Twenty-six member countries.

Pres. Prof. Georg Morgenstierne (Norway); Sec.-Gen. Helmuth Scheel, 2 Geschwister-Scholl-strasse, Mainz 22b, Germany. Publs. Four oriental bibliographies, *Acts* (of the Congresses), *Philologiae Turcicae Fundamenta, Materialien zum Sumerischen Lexikon, Sanskrit Dictionary, Corpus Inscriptionum Iranicarum, Linguistic Atlas of Iran, Wörterbuch der klassischen Arabischen Sprache, Mogul Literature.*

International Union of Prehistoric and Protohistoric Sciences (*Union internationale des sciences préhistoriques et protohistoriques*); f. 1931. Object: to promote congresses and scientific work in the fields of Pre- and Protohistory. Seventy-nine member countries.

Pres. J. Filip (Czechoslovakia); Sec.-Gen. S. J. De Laet, 2 Blandijenberg, Ghent, Belgium. Publs. *Inventaria archeologica, Glossarium archaeologicum, Bibliographie annuelle de la Pierre taillée*, etc.

OTHER INTERNATIONAL ORGANISATIONS

AGRICULTURE

Food and Agriculture Organisation of the United Nations (*Organisation des Nations Unies pour l'Alimentation et l'Agriculture*), Viale delle Terme di Caracalla, Rome, Italy; f. 1945. Objects: To raise levels of nutrition and living standards, improve production and distribution of food and agricultural products (taking agriculture to include forestry and fisheries), and better the conditions of rural populations. The functions of FAO are advisory and consultative, and include the collection and dissemination of information on food and agriculture, and the encouragement of technical advances in relation to nutritional needs; provision of expert advisers to governments requesting such assistance, and fellowships for training technicians. Mems.: Governments of 88 countries; over 2,200 expert assignments and over 2,200 fellowships had been operated under the technical assistance programme.

Dir.-Gen. B. R. Sen (India); Deputy Dir.-Gen. N. C. Wright (U.K.). Publs. *The State of Food and Agriculture* (annually), *The Second World Food Survey* (1952), *Millions Still Go Hungry*, an appraisal of FAO's twelve years' work; Yearbooks of Trade and Production in Agriculture, Forestry and Fisheries, and many specialised technical studies and periodicals.

Dairy Society International (DSI) (*Société internationale laitière*), 1145 19th Street, N.W., Washington 6, D.C., U.S.A.; f. 1946 to foster the extension of dairy and dairy industrial enterprise internationally through an interchange and dissemination of scientific, technological, economic, dietary and other relevant information and through a bringing together of persons and entities devoted thereto; organiser and sponsor of the first World Congress for Milk Utilisation.

Pres. Lyman D. McKee (U.S.A.); Vice-Pres. John H. Bryant (Australia), Alvie J. Claxton (U.S.A.), Maurice Macari (France), Mitsugi Sato (Japan); Man. Dir. George W. Weigold (U.S.A.); Sec. Gordon T. Jeffers (U.S.A.). Publs. *D.S.I. Report to Members*, *D.S.I. Bulletin* (both approx. quarterly), *Market Frontier News*, and booklets on dairying in English and Spanish.

UNIVERSITIES

UNIVERSIDAD CENTRAL DEL ECUADOR
(Central University of Ecuador)

GARCIA MORENO 887 Y ESPEJO 945, CASILLA 166, QUITO

The Central University came into being as a result of the fusion, in 1769, of three institutions of higher learning: the Seminary of San Luis, founded 1594; the University of San Gregorio Magno, founded 1622—both Jesuit institutions; and the Dominican University of Santo Tomás de Aquino. In 1822 the University was reorganised. After undergoing various vicissitudes during the next hundred years, it was granted technical and administrative autonomy in 1925.

RESEARCH INSTITUTES

CENTRE NATIONAL DE LA RECHERCHE SCIENTIFIQUE (CNRS)

15 QUAI ANATOLE FRANCE, PARIS VII

Founded 1939.

Organisation. The CNRS is organised by the *Comité Interministériel de la Recherche scientifique et technique,* which proposes to the Government means of doing research and how to allocate funds. The *Comité National de la Recherche scientifique* forms the policy of the CNRS and controls 32 sections of 20 members each, covering the Natural Sciences and the Humanities.

Objects.

1. To co-ordinate and promote scientific research in all fields.
2. To make grants-in-aid to scientific bodies and to individuals to enable them to carry out research work.
3. To subsidise or set up laboratories for pure or applied research.

Director-General: JEAN COULOMB, Professor in the Faculté des Sciences de Paris.

Natural Sciences: P. DRACH.

Human Sciences: M. LEJEUNE.

Centre de documentation: 15 Quai Anatole France, Paris 7e; Dir. J. WYART. Library of 10,000 vols., 10,000 technical and scientific periodicals; publs. *Bulletin Signalétique* (monthly), *Annales de la Nutrition et de l'Alimentation* (two-monthly), *Archives des Sciences Physiologiques* (quarterly), *Annales d'Astrophysique* (two-monthly), *Annales de Géophysique* (quarterly), *Le*

CNRS RESEARCH CENTRES

A. Groupe des Laboratoires de Bellevue: 1 place Aristide Briand, Bellevue (Seine-et-Oise); f. 1938; Dir.-Gen. A. J. ROSE.

Astronomy and Geology

Laboratoire de Physique de la Basse Atmosphere: Dir. P. QUENEY.

Laboratoire de Géologie du Quaternaire: Dir. Mlle ALIMEN.

Physics

Laboratoire des Rayons X: Dir. J. J. TRILLAT.

Laboratoire Aimé Cotton, Laboratoire du Grand Electro Aimant et des Basses Températures: Dir. P. JACQUINOT.

Laboratoire de Cristallographie: Dir. C. RERAT.

Laboratoire d'Aérothermique: 4 ter route des Gardes, Meudon; Dir. ED. BRUN.

Laboratoire des Hautes Pressions: Dir. B. VODAR.

Laboratoire des Echanges Thermiques: Dir. F. CABANNES.

Laboratoire de Physique du Froid et Service d'Essai: 4 ter route des Gardes, Bellevue; Dir. P. LAINE.

Laboratoire du Magnétisme et de Physique du Solide: Dir. CH. GUILLAUD.

Chemistry

Laboratoire d'Electrolyse: 9 rue Emile, Bellevue; Dir. BONNEMAY.

Centre d'Electrophorèse: 13 rue Pierre Curie, Paris 5e; Dir. M. BONNEMAY.

Laboratoire de Chimie des Radiations: Dir. M. MAGAT.

Laboratoire de Recherches sur les Terres Rares: Dir. F. TROMBE.

Centre d'Etudes et de Recherches de Chimie Organique Appliquée: Dir. P. RUMPF.

Laboratoire de Lipochimie: Dir. PH. PAQUOT.

Laboratoire de Chimie Moléculaire: Dir. J. PETIT.

Biology

Station Centrale d'Ultracentifugation: 13 rue Pierre Curie, Paris 5e; Dir. Mme S. FILITTI-WURMSER.

Centre de Recherches sur la Nutrition: 9 rue Emile, Bellevue; Dir. R. JACQUOT.

Laboratoire de Biologie Végétale de la Station du Froid: 4 ter route des Gardes, Meudon; Dir. R. ULRICH.

B. Centre de Recherches Physiques: 31 Chemin Joseph Aiguier, Marseille (Bouches-du-Rhône); f. 1941; Dir. TH. VOGEL.

Laboratoire d'Acoustique: Dir. TH. VOGEL.

Structure des Corps Cristallins: Dir. R. MICHAUD.

C. Centre de Recherches Nucléaires: rue du Loess, Strasbourg-Cronenbourg (Bas-Rhin); f. 1957.

Département de Physique Nucléaire: Dir. S. GORODETZKY.

Département de Physique Corpusculaire: Dir. P. CUER.

Département de Chimie Nucléaire: Dir. MELLE M. PEREY.

Département des Applications Biologiques: Dir. J. H. VIVIEN.

D. Groupe des Laboratoires de Gif-sur-Yvette: Gif-sur-Yvette (Seine-et-Oise).

Centre des Faibles radioactivités: f. 1955; by the C.N.R.S. and the Commissariat à l'Energie Atomique; Dir. L BUGNARD.

Centre de Recherches Hydrobiologiques: f. 1946; Dir. M LEFÈVRE.

Laboratoire de Génitique Physiologique: f. 1946; Dir. B. EPHRUSSI.

Laboratoire de Génétique des Virus: f. 1946; Dir. PH. L'HÉRITIER.

Laboratoire de Génétique Evolutive et de Biométrie: f. 1946; Dir. G. TEISSIER.

Laboratoire de Photobiologie: f. 1957; Dir. J. BENOIT.

Laboratoire de Photosynthèse: f. 1953; Dir. A. MOYSE.

Laboratoire d'Enzymologie: f. 1959; Dir. G. COHEN.

Laboratoire du Phytotron: f. 1957; Dir. P. CHOUARD.

Centre de Sélection des Animaux de Laboratoire: f. 1953; Dir. M. SABOURDY.

Institut de Chimie des Substances Naturelles: f. 1959; Dirs. M. JANOT and E. LEDERER.

E. Laboratoires de Sciences Mathematiques, Physico-Chimiques, Biologiques et Naturelles.

Mathematics

Institut de Calcul "Blaise Pascal": 25-39 avenue de la Division Leclerc, Châtillon-sous-Bagneux (Seine); f. 1945; Dir. J. PÉRÈS.

Centre d'Etudes pour la Traduction Automatique: Fort de Montrouge, B.P. No. 16, Arcueil, Paris and 44-46 Avenue Félix Viallet, Grenoble; Dirs. MM. SESTIER and VANQUOIS.

Laboratoires d'Analogies Electriques: Dir. L. MALAVARD.

Laboratoire de Calcul Numérique: Bâtiment H. Poincaré, 11 rue Pierre Curie, Paris 5e; Dir. R. DE POSSEL.

Section d'Automatique Documentaire: Pavillon de Flore, Palais du Louvre, Paris 1er; f. 1960; Dir. Dr. J. C. GARDIN.

Séminaires d'Econométrie: f. 1947; Dirs. M. ALLAIS, H. EYRAUD, R. ROY.

Institut Henri Poincaré: 11 rue Pierre Curie, Paris 5e.

Institut de Science financière et d'Assurances: 15 Quai Cl. Bernard, Lyon 7e.

Centre de Mécanique Ondulatoire Appliquée: 155 rue de Sèvres, Paris 15e; f. 1957; Dir. R. DAUDEL.

Astronomy and Geology

Institut d'Astrophysique: 98-*bis* boulevard Arago, Paris 14e; f. 1936; Dir. A. DANJON.

Observatoire de Haute-Provence: Saint-Michel-l'Observatoire (Basses-Alpes); f. 1937; Dir. Prof. J. DUFAY.

Service des Mouvements Propres Stellaires: f. 1947; sections in observatories in Paris, Bordeaux and Toulouse.

Observatoire de l'Université de Bordeaux: Floirac (Gironde); Dir. PIERRE SEMIROT.

Observatoire de Haute Provence: *see under* Centre National de la Recherche Scientifique.

Observatoire de Lyon: Saint-Genis-Laval (Rhône); specialises in photometry and spectroscopy, and studies in the upper atmosphere; Dir. JEAN DUFAY.

Observatoire de Marseille: 2 place Le Verrier, Marseille IV; Dir. Prof. CH. FEHRENBACH.

Observatoire de Nice: Nice, Mont-Gros (Alpes-Maritimes); f. 1881; affiliated to the University of Paris; Dir. J.-C. PECKER; publs. *Annales, Bulletin.*

Observatoire de Paris: 61 avenue de l'Observatoire, Paris XIV; f. 1667; library of 40,000 vols.; Dir. M. DANJON; Sec. M. GUIDONI; publs. *Bulletin Astronomique* (quarterly), *Catalogues d'Etoiles, Notes et Informations* and *Bulletin Horaire du Bureau International de l'Heure.*

Observatoire du Pic du Midi: Bagnères de Bigorre (Hautes-Pyrénées); f. 1880; Dir. J. ROSCH; Administrator CH. SOULA.

Observatoire de Strasbourg: 11 rue de l'Université, Strasbourg; f. 1881; library of 14,000 vols.; 4 astronomers; Dir. PIERRE LACROUTE; Publ. *Annales.*

Observatoire de Toulouse: 1 avenue Camille Flammarion, Toulouse; f. 1733; 14 mems.; Dir. Prof. R. BOUIGUE; publs. *Carte du Ciel, Catalogue Photographique du Ciel, Annales de l'Observatoire de Toulouse.*

Section de Météorologie Maritime: 1 quai Branly, Paris VII; Dir. Cap. VAIS JONGLEZ.

Service de la Météorologie d'Outre-Mer: 1 quai Branly, Paris VII; Dir. M. PERLAT.

Service Météorologique Métropolitain: 2 Ave. Rapp, Paris VII; library of 45,000 vols.; Dir. P. LECLERCQ; publs. include *Bulletins* (daily).

Station de Radioastronomie de Nançay: administered by the Observatoire de Paris, Section d'Astrophysique de Meudon, Meudon, (S.-et-O.); f. 1953; study of the sun; radio telescope; 37 mems.; Dir. and Chief Astronomer J. F. DENISSE, Asst. Astronomers J. L. STEINBERG, E. J. BLUM, A. BOISCHOT; many publs. on astronomy.

BIOLOGY

Institut de Biologie Marine de France: f. 1931; comprises nine maritime laboratories: Roscoff (Finistère): Dir. Prof. G. TEISSIER; Banyuls-sur-Mer (Pyrénées Orientales): Dir. Prof. G. PETIT; Villefranche-sur-Mer(A.M.), Dinard (I. et V.): Dir. Prof. FISHER-PIETTE; Concarneau (Finistère): Dir. Prof. ROCHE; Arcachon (Gironde): Dir. Prof. WEILL; Sète (Herault): Dir. Prof. MATHIAS; Luc-sur-Mer (Calvados): Dir. Prof. BOCQUET; Endoume (B.d.Rh.): Dir. Prof. PÉRÈS.

Institut de Biologie Physico-chimique: 13 rue Pierre Curie, Paris V; f. 1927; library of 7,500 vols.; Dir. RENE WURMSER; Dirs. of Laboratories: J. DUCLAUX (Colloids), R. WURMSER (Biophysics), Mrs. KHOUVINE ET GRUNBERG MANAGO (Biochemistry), TH. CAHN (Physiology), B. EPHRUSSI (Genetics), B. PULLMAN (Theoretical Biochemistry).

ECONOMICS, STATISTICS, SOCIOLOGY

Institut National d'Etudes Démographiques: 23-25 avenue Franklin D. Roosevelt, Paris VIII; f. 1945; Dir. JEAN BOURGEOIS-PICHAT; Gen. Sec. ROGER PELTIER.

Institut National de la Statistique et des Etudes Economiques: 29 quai Branly, Paris VII; f. 1946; centralises and co-ordinates the statistical activities of the various Government departments: Dir.-Gen. CLAUDE GRUSON.

Maison des Sciences de l'Homme: 20 rue de la Baume, Paris 8e (provisional address); f. 1963; to conduct research in the social sciences; Administrator F. BRAUDEL; Librarian G. LEBEL.

HYDROLOGY

Association Française pour l'Etude des Eaux: 25 avenue Marceau, Paris 16e; f. 1949; studies practical problems of domestic, agricultural and industrial use of water and its exploitation, storage and purification; Pres. R. PREAUD; Dir. R. COLAS; Admin. Sec. ANNA ZDILAR; publ. *Eaux et Industries* (monthly).

Association Nationale de Protection des Eaux: Conservatoire National des Arts et Métiers (C.N.A.M.), 292 rue St.-Martin, Paris 3e; brings to public notice the necessity of protecting and preserving the quality and quantity of water-supplies, studies problems of water pollution and its prevention; Pres. N. FONTAINE; Treas. CARRAS; Gen. Sec. R. COLAS.

Institut d'Hydrologie et de Climatologie: à la Faculté de Médecine, 45 rue des Saints Pères, Paris 6e; five main laboratories in Paris, and further laboratories at the principal spas; Sec.-Gen. Prof. L. BINET; Publ. *Les Annales de l'Institut d'Hydrologie et de Climatologie.*

Société Hydrotechnique de France: 199 rue de Grenelle, Paris 7e; Hon. Pres. EMILE BARILLON; Pres. JOSEPH DUFFAUT.

MEDICINE

Institut Alfred-Fournier: 25 boulevard Saint-Jacques, Paris XIV; Dir. Dr. SICARD DE PLAUZOLES.

Institut National d'Hygiène: 3 rue Léon Bonnat, Paris XVI; f. 1941; Dir. Prof. L. BUGNARD; Sec.-Gen. P. COMET; publs. *Bulletin, Monographies.*

Prof. Dr. GERHARD HESS; Vice-Pres. Prof. Dr. HANS-JOCHEM AUTRUM, Prof. Dr. WILHELM WALCHER-Prof. Dr.-Ing. KURT KLÖPPEL, Prof. Dr. HANS KAUFF, MANN; Dir.-Gen. Dr. ERNST HELLMUT VITS; Gen. Sec. Dr. KURT ZIEROLD.

Deutsche Gesellschaft für Forschung e.V.: Bad Gotesburg, Frankengraben 40.

Forschungsinstitut für Internationale Technische Zusammenarbeit: Rheinisch-Westfälische Technische Hochschule Aachen, 5100 Aachen, Theaterstr. 88; Dir. Prof. Dr.-Ing. HANS A. HAVEMANN.

Max-Planck-Gesellschaft zur Förderung der Wissenschaften e.V. (*Max Planck Society for the Advancement of Science*): Göttingen, Bunsenstrasse 10; supersedes the former Kaiser-Wilhelm-Gesellschaft, Berlin (f. 1911); Pres. Prof. Dr. ADOLF BUTENANDT; Vice-Pres. Prof. Dr. HANS DÖLLE, Prof. Dr. RICHARD KUHN, Prof. Dr.-Ing. CARL WURSTER; Admin. Dr. HANS BALLREICH (Munich), HANS SEELIGER (Göttingen). Presidential Office: Munich 1, Residenzstr. 1A. Berlin Admin. Office: Berlin-Dahlem, Thielallee 69/73. Düsseldorf Office: Düsseldorf, Kaiserswerther Strasse 164. The Society has the following Research Institutes:

Aerodynamische Versuchsanstalt Göttingen e.V. in der Max-Planck-Gesellschaft z.F.d.W.: Göttingen, Bunsenstr. 10; Dir. Prof. Dr. HERMANN SCHLICHTING.

Max-Planck-Institut für Aeronomie: Lindau über Northeim; Managing-Dir. Prof. Dr. WALTER DIEMINGER.

Institut für Stratosphären-Physik: Dir. Prof. Dr. JULIUS BARTELS.

Institut für Ionosphären-Physik: Dir. Prof. Dr. WALTER DIEMINGER.

Max-Planck-Institut für Arbeitsphysiologie (*Occupational Physiology*): Dortmund, Rheinlanddamm 201; Dir. Prof. Dr. GUNTHER LEHMANN.

Bibliotheca Hertziana (Max-Planck-Institut) (*Library*): Rome, Palazzo Zuccari, Via Gregoriana 28; Dir. Prof. Dr. WOLFGANG LOTZ. (*See under* Italy—Libraries.)

Forschungsstelle für Bioakustik in der Max-Planck-Gesellschaft z.F.d.W.: Tübingen, Biesinger Strasse 8; Dir. Prof. Dr. ALBRECHT FABER.

Max-Planck-Institut für Biochemie (*Bio-Chemistry*): Munich 15, Goethestrasse 31; Dir. Prof. Dr. ADOLF BUTENANDT; Dep. Dir. Prof. Dr.-Ing. HEINZ DANNENBERG.

Max-Planck-Institut für Biologie (*Biology*): Tübingen, Corrensstr. 41; Man. Dir. Prof. Dr. WOLFHARD WEIDEL.

Abteilung Beermann: Tübingen, Spemannstrasse 34; Dir. Prof. Dr. WOLFGANG BEERMANN.

Abteilung Melchers: Tübingen, Corrensstrasse 41; Dir. Prof. Dr. GEORG MELCHERS.

Abteilung Reichardt: Tübingen, Spemannstr. 34; Dir. Dr. WERNER-ERNST REICHARDT.

Abteilung Weidel: Tübingen, Correnstrasse 38; Dir. Prof. Dr. WOLFHARD WEIDEL.

Max-Planck-Institut für Biophysik (*Bio-physics*): Frankfurt a.M.-Süd 10, Forsthausstrasse 70; Dir. Prof. Dr. BORIS RAJEWSKY.

Max-Planck-Institut für Chemie (Otto-Hahn-Institut) (*Chemistry*): Mainz, Saarstrasse 23; Dir. Prof. Dr. JOSEF MATTAUCH.

Massenspektroskopische Abteilung: Dir. Prof. Dr. HEINRICH HINTENBERGER.

Kernphysikalische Abteilung: Dir. Prof. Dr. HERMANN WAFFLER.

Chemische Abteilung: Head (Vacant).

Max-Planck-Institut für Physikalische Chemie: Göttingen, Bunsenstr. 10; Dir. Prof. Dr. CARL WAGNER.

Abteilung Eigen: Dir. Dr. MANFRED EIGEN.

Max-Planck-Institut für Eisenforschung (*Iron*): Düsseldorf, Max-Planck-Strasse 1; Dir. Prof. Dr. WILLY OELSEN.

Max-Planck-Institut für Eiweiss- und Lederforschung (*Protein and Leather Research*): München 15, Schillerstr. 46; Dir. Prof. Dr. WOLFGANG GRASSMANN.

Abteilung für Röntgenstrukturforschung: Head Prof. Dr. WALTER HOPPE.

Max-Planck-Institut für vergleichende Erbbiologie und Erbpathologie (*Heredity*): Berlin-Dahlem, Ehrenbergstrasse 27-28; Head Prof. Dr. FRITZ KAUDEWITZ.

Abteilung für Mikrobengenetik: Dir. Prof. Dr. FRITZ KAUDEWITZ.

CC-0. Agamnigam Digital Presevation Foundation, Chandigarh

Max-Planck-Institut für Ernährungsphysiologie (*Nutrition*): Dortmund, Rheinlanddamm 201; Dir. Prof. Dr. HEINRICH KRAUT.

Max-Planck-Institut für Geschichte: Göttingen, Hoher Weg 11; Dir. Prof. Dr. HERMANN HEIMPEL.

Gmelin-Institut für anorganische Chemie und Grenzgebiete in der Max-Planck-Gesellschaft z.F.d.W. (*Inorganic Chemistry*): Frankfurt a.M., Varrentrappstr. 40-42, Carl Bosch-Haus; Dir. Prof. Dr. ERICH PIETSCH.

Fritz - Haber - Institut der Max - Planck - Gesellschaft z.F.d.W. (*Physical-Chemistry*): Berlin-Dahlem, Faradayweg 4-6; Dir. Prof. Dr. RUDOLF BRILL; Deputy Dir. Prof. Dr. I. N. STRANSKI.

Abteilung für physikalische Chemie: Berlin-Dahlem, Faradayweg 4-6; Dir. Prof. Dr. I. N. STRANSKI.

Institut für Elektronenmikroskopie: Berlin-Dahlem, Faradayweg 4-6; Dir. Prof. Dr. ERNST RUSKA.

Max-Planck-Institut für Hirnforschung (*Brain Research*): Frankfurt/Main-Niederrad, Deutschordenstr. 46; Man. Dir. Prof. Dr. WILHELM TÖNNIS.

Neuroanatomische Abteilung: Frankfurt/Main-Niederrad, Deutschordenstr. 46; Dir. Prof. Dr. ROLF HASSLER.
